Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Fuderer '521. No distinction is seen between the process disclosed by Fuderer '521, and that recited in claims 1-7. Fuderer discloses at col. 6, lines 23-38 that the oxygen reacts with methane so that non-catalytic partial oxidation reactions (2), (3) and (4) occur, with the resulting reaction mixture passing downward through reforming bed 8.

Claims 9-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fuderer '521 as applied to claims 1-7 above, and further in view of applicant's admitted prior art. It would be further obvious from applicant's admitted prior art (page 2, lines 10-21 of the specification) to subject the synthesis gas formed according to the process of Fuderer '521 to the Fischer-Tropsch reaction, and to hydroconvert the resulting hydrocarbon by hydrogenation, hydroisomerization or catalytic dewaxing.
